Rockville, MD 20852

8916 '00 AUG -7 P1:45

Hello Ms. Jane Henney,

My name is Theresa Strepek and I have a husband and young son, Jack (17 mos). With the birth of my son, Jack, I began to realize that most commercially available food (if not all) is of very poor substance, radiated, treated with pesticides, genetically engineered etc..... I have eaten foods from Alberts, Jewel/Osco & Dominicks (all commercial grocery stores) my entire life. I am OUTRAGED at the fact that pesticides, radiation & genetically engineered (GE) foods aren't labeled as such.

We consumers need to know exactly what we are buying so we can make an intelligent choice about what we are feeding our families.

**ANY FOOD THAT HAS BEEN ALTERED, TREATED, GROWN WITH TOXIC PESTICIDES OR GENETICALLY ENGINEERED MUST BE LABELED AS SUCH.**

I 100% support Docket #00P-1211/CPI, the citizen's petition for labeling of genetically engineered foods.

Plain and Simple, Here's my request to you.

- 1.) Label all GE foods so I have a choice!
- 2.) Mandate pre-market safety testing and assess the affect of these foods on the environment
- 3.) Provide a moratorium on all GE foods until these requirements are met.

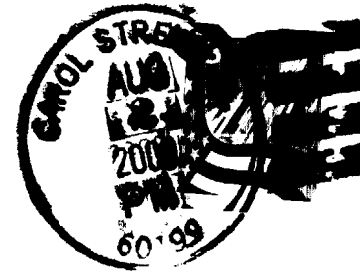

Thank You for your time. I sincerely hope you will pass Docket 00P-1211/CPI into LAW!
